

City of Garden Plain Snow Route Plan

The map pictured above indicates the snow routes for the city of Garden Plain. City personnel will begin plowing the snow routes when the snow accumulation reaches two and one half inches (2-1/2"), if conditions allow. All remaining streets will be plowed as needed, after the snow routes are cleared.

Please remove all parked vehicles, trailers, etc. from the streets during snowfalls exceeding two and one half inches (2-1/2") of accumulation, so the streets can be plowed.
